

CLAIMS

1. A cutting head for a brush cutter, edge trimmer or similar, the head being of the type including a passage  
5 for a cutter string (300) and a moving element (400) for locking the string, suitable for locking the string between itself and a backing wall, the head being characterized in that the locking element presents a section in a direction extending transversely to the  
10 string that presents at least one indentation (403), with contact being made between the locking element and the string at least on either side of the indentation.
2. A cutting head according to claim 1, characterized in  
15 that the locking element (400) includes arrangements (404) for gripping the string.
3. A cutting head according to claim 2, characterized in  
20 that the gripping arrangements comprise teeth (404).
4. A cutting head according to claim 1, characterized in  
that the locking element includes a longitudinal groove  
(403).
- 25 5. A cutting head according to claim 4, characterized in  
that the groove presents a rounded section.
6. A cutting head according to claim 4, characterized in  
that the groove presents an angular section.
- 30 7. A cutting head according to claim 6, characterized in  
that the groove presents a rectangular section.

8. A cutting head according to any one of claims 4 to 7, characterized in that the groove is of width smaller than the width of the string (300).
- 5 9. A cutting head according to any one of claims 1 to 7, characterized in that the locking element (400) is of section substantially complementary to the section of the string.
- 10 10. A cutting head according to claim 1 or claim 9, characterized in that the groove presents a V-shaped section.
11. A cutting head according to claim 1 or claim 9,  
15 characterized in that the groove presents a circularly arcuate section.
12. A cutting head according to any one of claims 1 to 11, characterized in that the locking element (400)  
20 comprises a cam.
13. A cutting head according to any one of claims 1 to 11, characterized in that the locking element (400) comprises a shoe that is movable in translation.  
25
14. A vegetation cutting device such as a brush cutter, edge trimmer or similar, characterized in that it includes a cutting head according to any one of claims 1 to 13 and a motor suitable for driving said head in  
30 rotation.
